EXPERIENCE

Software Engineer

Infosys Limited, Chandigarh, Punjab

Aug 2022 - Present

Projects

Project-1

Equinox

- Developed and maintained full-stack applications using Java, Spring Boot for the backend, and React for the frontend.
- Implemented RESTful APIs and integrated them with front-end components.
- Worked closely with cross-functional teams to design, develop, and deploy new features.
- Performed unit testing, integration testing, and bug fixing to ensure high-quality software.
- Utilized Git for version control and collaborated using Agile methodologies.
- Optimized application performance, improving response times and reducing server load.

Project-2

Drupal

- **CMS Expertise:** Proficient in Drupal for content management and web development.
- **Data Management:** Experienced in data extraction from Spice (Consumer database) and ensuring seamless data flow with other systems.
- **Frontend Skills:** Skilled in text and image updates on Drupal-based websites, occasional CSS adjustments for improved frontend appearance and user experience.

Project-3

Blogging Application

- Here I am creating a blogging Application where we can write blogs and articles and Users can also comment on the Blogs and articles.
- Users can create, update, delete and list the post.
- Users can also add, update, delete comments on the posts.
- New users should be able to Register on our application and then login Post include one picture too.
